INTRODUCTION

The State Domestic Product measures the economic development of the State. The State Domestic Product (SDP) or the State Income estimate is a monetary measure of all the 'goods and services' produced and accounted without duplication within the geographical boundaries of the State, for a specified period of time, whether marketed or self consumed. Therefore, the 'goods' include all possible commodities/items produced such as agricultural crops, livestock and livestock products, fish, forest products, mineral products, manufacturing of consumer items, machinery, transport equipments, defense equipments, construction of buildings, bridges, roads, dams etc., while the 'services' cover educational, medical, sanitary, government services etc. The State income and the per capita income play a vital role in formulation of policies and forecasting by Planners and Administrators. These estimates serve as an indicator to assess the status of the economy and also analysis insight and weaker sections.

STATE DOMESTIC PRODUCTS

The estimates of State Domestic Product prepared for all the sectors of the economy are mainly classified into Primary or Agriculture and allied sector, Secondary or Industry sector and Tertiary or Services sector both in terms of Gross and Net as also at Current and Constant or base year price. The estimates of 'Gross State Domestic Products' (GSDP) and 'Net State Domestic Products' (NSDP) are prepared by adopting Income Originating Approach.

CONCEPTS AND METHODOLOGY

In estimation of GSDP and NSDP the entire economy classified into three broad sectors is further subdivided into different sectors according to type of activities viz. Agriculture, Forestry, Fishing and Mining & Quarrying comprises of Primary Sector, Manufacturing (Registered and Un-registered), Construction, Electricity, Gas and Water supply forming Secondary Sector and Trade, Hotels and Restaurants, Transport, Storage and Communication, Banking and Insurance, Real Estate, Ownership of Dwellings, Legal and Business Services, Public Administration and Other Services clubbed in Tertiary Sector.

The general methodology for compiling the estimates is to first prepare the estimates at disaggregated level for each economic activity and then aggregate them for the entire State.

The estimates for different sectors of the economy can be measured by one of the three alternative approaches such as (i) Production Approach, (ii) Income Approach, and (iii) Expenditure Approach depending upon the availability of data.

In Production approach, the sum of the values of the goods and services produced within the boundaries of the State during a year is evaluated and value of inputs consumed in the process of production is deducted to arrive at the estimates of gross value added. This approach is followed in respect of sectors like Agriculture including livestock, Forestry, Fishing and Mining & Quarrying and Registered Manufacturing. In Income approach method, the income accrued to the factors of production like land, labour and capital in the form of rent, salary and wages and other money value of benefits and interest along with the profit of the entrepreneur are considered to estimate the value added. The sectors for which this method is adopted are Un-registered Manufacturing, Electricity, Gas and Water supply, Trade, Hotels and Restaurants, Transport, Storage and Communication, Banking and Insurance, Real Estate, Ownership of Dwellings, Legal and Business Services, Public Administration and Other Services. Expenditure approach is based on the measurement of income at the stage of disposal. The value added by Construction sector is estimated in this method.

The estimates of GSDP compiled are adjusted for bank charges or 'Financial Intermediation Services Indirectly Measured' (FISIM), while preparation of NSDP involves deduction of 'Consumption of Fixed Capital' (CFC) or depreciation for each sector of the estimates of GSDP.

The estimates of SDP at current prices are obtained by evaluating the goods and services produced at prevailing prices during the accounting period. These estimates at current prices do not reveal actual economic growth but gives the size of the economy, as it contain combined effect of 'change in the volume of goods and services' and 'change in prices of goods and services'. To achieve the real growth of the economy, the estimates of SDP are also compiled by evaluating the goods and services at the prices prevailing in the base year or the fixed year which eliminates the effect of change in the prices and are termed as SDP at constant prices.

Thus, estimates are prepared for GSDP and NSDP at current prices and constant prices.

The estimates of 'Per Capita Income' of the State at current and constant prices are obtained dividing NSDP by projected mid-year population of the State as made available by Registrar General of India.

FINANCIAL INTERMEDIATION SERVICES INDIRECTLY MEASURED

The unadjusted Gross State Domestic Product (GSDP) is compiled at initial stage and the adjustments are made at industry level for imputed bank charges i.e. Financial Intermediation Services Indirectly Measured (FISIM). The banking enterprises charge a certain nominal amount to its customers for providing banking services but charge high returns to earn profits on loans and advances. The output of these financial enterprises includes interest received for loans and services that are paid by the producing industries but this interest paid by the Industries is already accounted in the SDP of the respective Industry, its inclusion in the SDP of banking industry is thus, duplicated. To avoid this, FISIM is allocated to the Industries as intermediate income to reduce the SDP of the Industries such as Agriculture, livestock, mining and quarrying, manufacturing registered and un-registered, electricity, gas, transport, construction, storage, trade, hotels and restaurants, business services.

CONSUMPTION OF FIXED CAPITAL

While estimating 'Gross' results no Consumption of Fixed Capital (CFC) is deducted which takes place in the process of production, whereas in the 'Net' estimates, CFC is subtracted from gross value. In the process of production of goods, Plants & Machinery and Equipments used are expected to incur loss of economic life of individual fixed asset in value terms due to wear and tear and obsolescence. The CFC is defined as that part of gross product which is required to replace the fixed capital in the process of production during a given period. The estimates of CFC used in compilation of estimates for all the sectors are prepared at national level by National Accounts Division (NAD) of Central Statistics Office (CSO) and are allocated to the States.

SUPRA REGIONAL SECTOR

The activities of Railways, Communication, Banking and Insurance and Central Government Administration included in estimation of SDP are spread over the different States/UTs and not confined to the boundaries of the State. These sectors are known as Supra Regional Sectors. It is not possible to procure estimates of these sectors for a particular State independently. The estimates for these sectors are prepared by NAD in CSO on the basis of data on gross earnings, gross expenditure, wages and salaries, employment and other relevant indicators and suitably supplied to the respective States for inclusion in their estimates.

AN OVERVIEW

The base year of the present series of State Domestic Product is 2004-05, introduced by National Accounts Division of Central Statistics Office, Ministry of Statistics and Programme Implementation, Government of India during September, 2010. The estimates of GSDP, NSDP and Per Capita Income both at current and constant (or year 2004-05) prices for the years 2004-05 to 2013-14(Provisional estimates) are presented in this report. The estimates up to 2012-13 are approved by National Accounts Division (NAD) of Central Statistics Office (CSO), Ministry of Statistics and Programme Implementation (MOSPI), Government of India.

The estimates of GSDP at current and at Constant (2004-05) prices in the State of Goa for the years 2004-05 to 2013-14(Provisional estimates) are presented in Table-1.1. Comparison for the last three years are presented in this section, as under:

During 2012-13, the GSDP at current prices stood at Rs. 42407 crore as compared to Rs. 43255 crore in 2011-12, the growth rate estimated was (-) 1.96% (Table 3.1) over the previous year. The reason for its decline to negative trend was purely on account of ban on mining activity in the State, in particular the mining growth has reduced to (-) 68.05 from(-) 4.58 (Statement – 5) during this period. During 2011-12, the estimated GSDP growth at current prices was recorded at 28.71 % over 2010-11. The estimates are also compiled for 2013-14 (at provisional stage and subject to revision subsequently) which stood at Rs. 48897 crore registering a growth of 15.30 % (Table 3.1) over the year 2012-13. As can be seen in Table 1.3, the Per Capita Income at current prices has gone up to Rs. 229602 during 2012-13 from Rs. 88966 in the base year i.e. year 2004-05, further it has increased to Rs. 257490 during the year 2013-14 (provisional). The Per Capita

Income growth was 25.14 %, -4.51 % and 12.15% respectively during the last three years over their corresponding previous years. The sector-wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 43 % and 45 % in the base year has revised as 11 %, 44 % and 45 % during 2012-13, while in the year 2013-14 (provisional) the estimates distribution was 12 %, 42 % and 46 % as can be seen from table 2.1 and statement – 3.

As far as GSDP Constant (at 2004-05 prices) is concerned the estimates during 2012-13 has increased to Rs. 28173 crore as compared to Rs. 27045 crore in 2011-12, (Table 1.1) the decrease in the growth rate from 20.20% (2011-12) to 4.17% (2012-13) was however due to mining problem (Table 3.1). The estimates compiled for 2013-14(P) stood at Rs. 30345 crore registering a growth of 7.71 % over the previous years. The Per Capita Income has gone up to Rs. 152534 during 2012-13 from Rs. 88966 in the base year i.e. 2004-05. Further it has increased to Rs. 159797 during the year 2013-14(P) (Table 1.3). The growth was 17 %, 1% and 5 % respectively during the last three years over their corresponding previous years (Table 4.1). The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 43 % and 45 % in the base year have depicted a percentage of 5 %, 32 % and 63 %, during 2012-13, while in the years 2013-14(P) the distribution remained the same as can be seen from Table 2.2 and statement – 4.

The estimates of NSDP at Current and Constant (2004-05) prices in the State of Goa for the years 2004-05 to 2013-14(P) are presented in Table – 1.2. During 2012-13, the NSDP at current prices decreased to Rs. 37035 crore as compared to Rs. 38061 crore in 2011-12 thereby showing negative growth of -3% over the previous year due to non-contribution of income from mining sector (Table. 3.2). The estimates as compiled for 2013-14(P) stood at Rs. 42564 crore recording a growth of 15 % over the year 2012-13. The Per Capita Income has gone up to Rs. 200514 during 2012-13 from Rs. 76968 in the base year i.e. 2004-05, further it stood at Rs. 224138 during the year 2013-14(P) (Table. 1.4). The growth was 26 %, (-) 5 % and 12 % respectively during the last three years over their corresponding previous years (Table 4.2). The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 41 % and 47 % in the base year have recorded a percentage of 10 %, 44 % and 46 %, during 2012-13 respectively while in the year 2013-14(P) the distribution was 13 %, 40 %, 47 % as can be seen from Table 2.3 and statement – 9.

The estimates for the year 2012-13 at NSDP constant (2004-05) prices increased to Rs. 24421 crore as compared to Rs.23279 crore in 2011-12 (Table 1.2) attaining growth of 5 % over the previous year (Table 3.2). The estimates for 2013-14(P) increased to Rs. 26092 crore showing a growth of 7 % over the year 2012-13 (Table 3.2). The Per Capita Income has gone up to Rs. 132220 during 2012-13 from Rs. 76968 in the base year i.e. 2004-05, further it has increased to Rs. 137401 during the year 2013-14(P) (Table 1.4). The growth witnessed is 17 %, 2 % and 4 % respectively during the last three years over their corresponding previous years (Table 4.2). The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 41 % and 47 % in the base year have depicted a percentage of 4 %, 30 % and 66 %, during 2012-13 while in the year 2013-14(P) the distribution recorded was 5 %, 28 %, 67 % as can be seen from Table 2.4 and statement – 10.

The statements in detail from the base year 2004-05 to 2012-13 as final estimates and estimates for 2013-14 as provisional compilation for GSDP and NSDP at current, constant (2004-05) prices and Per Capita Income are presented in statements 1, 2, 7 and 8. The broad sector and industrial activity level percentage distribution and percentage growth of all the estimates along with Per Capita Income are presented in statements 3, 4, 9, 10 and 5, 6, 11, 12 respectively.
