GOVERNMENT OF GOA

STATE DOMESTIC PRODUCT IN GOA

2004-05 to 2011-12(Q)

DIRECTORATE OF PLANNING, STATISTICS AND EVALUATION

PANAJI – GOA

PREFACE

The State Domestic Product (SDP) representing the value of goods and services produced within the geographical boundaries of the State in a particular year is one of the most important indicators measuring the economic growth of the State. The Per Capita Income measures the standard of living of the people and is a major constituent of Human Development.

The estimates of Gross & Net State Domestic Product and Per Capita Income at Current and Constant prices are compiled based on data from all the sectors of the State economy.

I thank, the Central Statistical Organization and State Government departments for their cooperation in supplying the requisite data.

I hope this publication will be useful to the policy makers, administrators, planners and researchers. Suggestions for improvement of this publication are always welcome.

Place: Panaji – Goa
Date: October, 2012

INTRODUCTION

The State Domestic Product measures the economic development of the State. The State Domestic Product (SDP) or the State Income estimate is a monetary measure of all the 'goods and services' produced and accounted without duplication within the geographical boundaries of the State, for a specified period of time, whether marketed or self consumed. Therefore, the 'goods' include all possible commodities/items produced such as agricultural crops, livestock and livestock products, fish, forest products, mineral products, manufacturing of consumer items, machinery, transport equipments, defense equipments, construction of buildings, bridges, roads, dams etc., while the 'services' cover educational, medical, sanitary, government services etc. The State income and the per capita income play a vital role in formulation of policies and forecasting by Planners and Administrators. These estimates serve as an indicator to assess the status of the economy and also analysis insight and weaker sections.

STATE DOMESTIC PRODUCTS

The estimates of State Domestic Product prepared for all the sectors of the economy are mainly classified into Primary or Agriculture and allied sector, Secondary or Industry sector and Tertiary or Services sector both in terms of Gross and Net as also at Current and Constant or base year price. The estimates of 'Gross State Domestic Products' (GSDP) and 'Net State Domestic Products' (NSDP) are prepared by adopting Income Originating Approach.

CONCEPTS AND METHODOLOGY

In estimation of GSDP and NSDP the entire economy classified into three broad sectors is further subdivided into different sectors according to type of activities viz. Agriculture, Forestry, Fishing and Mining & Quarrying comprises of Primary Sector, Manufacturing (Registered and Un-registered), Construction, Electricity, Gas and Water supply forming Secondary Sector and Trade, Hotels and Restaurants, Transport, Storage and Communication, Banking and Insurance, Real Estate, Ownership of Dwellings, Legal and Business Services, Public Administration and Other Services clubbed in Tertiary Sector.

The general methodology for compiling the estimates is to first prepare the estimates at disaggregated level for each economic activity and then aggregate them for the entire State.

The estimates for different sectors of the economy can be measured by one of the three alternative approaches such as (i) Production Approach, (ii) Income Approach, and (iii) Expenditure Approach depending upon the availability of data.

In Production approach, the sum of the values of the goods and services produced within the boundaries of the State during a year is evaluated and value of inputs consumed in the process of production is deducted to arrive at the estimates of gross value added. This approach is followed in respect of sectors like Agriculture including livestock, Forestry, Fishing and Mining & Quarrying and Registered Manufacturing. In Income approach method, the income accrued to the factors of production like land, labour and capital in the form of rent, salary and wages and other money value of benefits and interest along with the profit of the entrepreneur are considered to estimate the value added. The sectors for which this method is adopted are Un-registered Manufacturing, Electricity, Gas and Water supply, Trade, Hotels and Restaurants, Transport, Storage and Communication, Banking and Insurance, Real Estate, Ownership of Dwellings, Legal and Business Services, Public Administration and Other Services. Expenditure approach is based on the measurement of income at the stage of disposal. The value added by Construction sector is estimated in this method.

The estimates of GSDP compiled are adjusted for bank charges or 'Financial Intermediation Services Indirectly Measured' (FISIM), while preparation of NSDP involves deduction of 'Consumption of Fixed Capital' (CFC) or depreciation for each sector of the estimates of GSDP.

The estimates of SDP at current prices are obtained by evaluating the goods and services produced at prevailing prices during the accounting period. These estimates at current prices do not reveal actual economic growth but gives the size of the economy, as it contain combined effect of 'change in the volume of goods and services' and 'change in prices of goods and services'. To achieve the real growth of the economy, the estimates of SDP are also compiled by evaluating the goods and services at the prices prevailing in the base year or the fixed year which eliminates the effect of change in the prices and are termed as SDP at constant prices.

Thus, estimates are prepared for GSDP and NSDP at current prices and constant prices.

The estimates of 'Per Capita Income' of the State at current and constant prices are obtained dividing NSDP by projected mid-year population of the State as made available by Registrar General of India.

FINANCIAL INTERMEDIATION SERVICES INDIRECTLY MEASURED

The unadjusted Gross State Domestic Product (GSDP) is compiled at initial stage and the adjustments are made at industry level for imputed bank charges i.e. Financial Intermediation Services Indirectly Measured (FISIM). The banking enterprises charge a certain nominal amount to its customers for providing banking services but charge high returns to earn profits on loans and advances. The output of these financial enterprises includes interest received for loans and services that are paid by the producing industries but this interest paid by the Industries is already accounted in the GDP of the respective Industry, its inclusion in the GDP of banking industry is thus, duplicated. To avoid this, FISIM is allocated to the Industries as intermediate income to reduce the GDP of the Industries such as Agriculture, livestock, mining and quarrying, manufacturing registered and un-registered, electricity, gas, transport, construction, storage, trade, hotels and restaurants, business services.

CONSUMPTION OF FIXED CAPITAL

While estimating 'Gross' results no Consumption of Fixed Capital (CFC) is deducted which takes place in the process of production, whereas in the 'Net' estimates, CFC is subtracted from gross value. In the process of production of goods, Plants & Machinery and Equipments used are expected to incur loss of economic life of individual fixed asset in value terms due to wear and tear and obsolescence. The CFC is defined as that part of gross product which is required to replace the fixed capital in the process of production during a given period. The estimates of CFC used in compilation of estimates for all the sectors are prepared at national level by National Accounts Division (NAD) of Central Statistics Office (CSO) and are allocated to the States.

SUPRA REGIONAL SECTOR

The activities of Railways, Communication, Banking and Insurance and Central Government Administration included in estimation of SDP are spread over the different States/UTs and not confined to the boundaries of the State. These sectors are known as Supra Regional Sectors. It is not possible to procure estimates of these sectors for a particular State independently. The estimates for these sectors are prepared by NAD in CSO on the basis of data on gross earnings, gross expenditure, wages and salaries, employment and other relevant indicators and suitably supplied to the respective States for inclusion in their estimates.

AN OVERVIEW

The base year of the present series of State Domestic Product is 2004-05, introduced by National Accounts Division of Central Statistics Office, Ministry of Statistics and Programme Implementation, Government of India during September, 2010. The estimates of GSDP, NSDP and Per Capita Income both at current and constant (2004-05) prices for the years 2004-05 to 2011-12(Quick estimates) are presented in this report. The estimates presented in this report for 2010-11 at Provisional stage and 2011-12 at Quick stage are subject to revise on finalization by Central Statistics Office, Government of India at appropriate time.

The estimates of GSDP at current and Constant (2004-05) prices in the State of Goa for the years 2004-05 to 2011-12(Quick estimates) are presented in Table-1. During 2009-10, the GSDP at current prices stood at Rs.29126 crore as compared to Rs.25414 crore in 2008-09 thereby showing growth of 15 % over the previous year. The estimates are also compiled for 2010-11 and 2011-12 at provisional and quick stage which stood at Rs. 33500 crore and Rs. 36775 crore registering a growth of 15 % and 10 % respectively over their previous years. The Per Capita income has gone up to Rs. 172239 during 2009-10 from Rs. 88966 in the base year i.e. 2004-05, further it has increased to Rs. 191539 and Rs. 204419 during the years 2010-11(P) and 2011-12(Q). The growth is 10 %, 11 % and 7% during the last three years over their previous years. The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 43 % and 45 % in the base year has varied during 2009-10 as 23 %, 33 % and 44 %, while in the year 2010-11 at Provisional estimates the distribution was 25 %, 30 % and 44 % respectively as can be seen from statement – 5 in the next chapter. To compile the

same provisionally at Quick stage in 2011-12 the distribution is estimated at 25%, 29% and 46% respectively.

As far as GSDP Constant (2004-05 prices) is concerned the estimates during 2009-10, increased to Rs.19248 crore as compared to Rs.17466 crore in 2008-09 showing a growth of 10.20 % over the previous year. The estimates compiled for 2010-11 and 2011-12 at provisional and quick stage stood at Rs. 21259 crore and Rs. 24067 crore registering a growth of 10.45% and 13.21 % respectively over their previous years. The Per Capita income has gone up to Rs. 113828 during 2009-10 from Rs. 88966 in the base year i.e. 2004-05, further it has increased to Rs. 121549 and Rs. 133778 during the years 2010-11(P) and 2011-12(Q). The growth is 6 %, 7 % and 10 % during the last three years over their previous years. The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 43 % and 45 % in the base year has depicted during 2009-10 as 12 %, 39 % and 49 %, while in the year 2010-11 at Provisional estimates and 2011-12 at Quick compilation the distribution was 11 %, 39% and 50 % and 11%, 37% and 52% respectively as can be seen from statement – 6 in the next chapter.

The estimates of NSDP at current and Constant (2004-05) prices in the State of Goa for the years 2004-05 to 2011-12(Quick estimates) are presented in Table-2. During 2009-10, the NSDP at current prices increased at Rs.25224 crore as compared to Rs.22149 crore in 2008-09 thereby showing growth of 14 % over the previous year. The estimates as compiled for 2010-11 and 2011-12 at provisional and quick stage stood at Rs. 28790 crore and Rs. 31037 crore recording a growth of 14 % and 8% respectively over their previous years. The Per Capita income has gone up to Rs. 149164 during 2009-10 from Rs. 76968 in the base year i.e. 2004-05, further it has increased to Rs. 164607 and Rs. 172523 during the years 2010-11(P) and 2011-12(Q). The growth is 10 %, 10 % and 5 % respectively during the last three years over their previous years. The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 41 % and 47 % in the base year has depicted during 2009-10 as 21 %, 33 % and 46 %, while in the year 2010-11 at Provisional estimates and during 2011-12 (Q) the distribution was 23 %, 30 % and 46 % and 22%, 29% & 49% respectively as can be seen from statement –7 in the next chapter.

The estimates for the year 2009-10 at NSDP constant (2004-05) prices increased at Rs.16119 crore as compared to Rs.14728 crore in 2008-09 attaining growth of 9 % over the previous year. The estimates for 2010-11 and 2011-12 at provisional and quick stage stood at Rs. 18324 crore and Rs. 21132 crore showing a growth of 14 % and 15 % respectively over their previous years. The Per Capita income has gone up to Rs. 95320 during 2009-10 from Rs. 76968 in the base year i.e. 2004-05, further it has increased to Rs. 104769 and Rs. 117464 during the years 2010-11(P) and 2011-12(Q). The growth is 5 %, 10 % and 12 % respectively during the last three years over their previous years. The sector wise percentage distribution shows that Primary, Secondary and Tertiary Sectors which stood at 12 %, 41 % and 47 % in the base year has depicted during 2009-10 as 8 %, 40% and 52 %, while in the year 2010-11 at Provisional estimates and 2011-12 at Quick calculation the distribution was 9 %, 39 % and 53 % and 9%, 36% and 55% respectively as can be seen from statement –8 in the next chapter.

The statements in detail from the base year 2004-05 to 2011-12 at Quick compilation for GSDP and NSDP at current, constant (2004-05) prices and Per Capita Income are presented in Statements 1 to 4. The broad sector and industrial activity level percentage distribution and percentage growth of all the estimates along with Per Capita Income are depicted in Statement 5 to 12 under Chapter 2.

A statement presenting Gross State Domestic Product at Current prices of broad industry groups from the 1980-81 to 2004-05 for the use of researchers, planners and other scholars may be viewed at Statement 13 to16. The base years for these estimates are however revised from time to time, the latest in the year 2004-05.
