ANNUAL SURVEY OF INDUSTRIES

2008-09

PREFACE

The **"Annual Survey of Industries**" (ASI) is the prime source of Industrial Statistics which provides the basic statistics of industrial sector. The frame of factories used for the survey corresponds to the list of factories registered under the Factories Act, 1948, as maintained by the Chief Inspector of Factories & Boilers, Government of Goa.

This **Report on Annual Survey of Industries** pertains to the year 2008-09, is the 36th in the series. It is compiled based on the information collected by the National Sample Survey Organization (NSSO), Field Operations Division (FOD), Government of India, under the statutory provision of The Collection of Statistics Act, 1953, and the rules framed there under in 1959. The detailed tables presented in this report have been generated by Central Statistical Organization (CSO), Kolkata. The report presents a broad picture of the pattern and growth of organized industrial sector in Goa. It provides estimates of different variables of industrial statistics viz., capital structure, employment, input, output, and value added by manufacture, etc. by certain industry groups.

Constructive suggestions to improve the publication are always welcome.

CHAPTER ONE

INTRODUCTION

1.1 The present Report on Annual Survey of Industries (ASI) for the year 2008-09 is the thirty-sixth in the series of such reports brought out by this Directorate. It incorporates data in respect of industrial statistics collected through the Annual Survey of Industries in the organized factory sector in this State by the National Sample Survey Organization (NSSO), Government of India, under the statutory provisions of the collection of Statistics Act, 1953 and the rules framed there under in 1959.

1.2 The Director General, Field Operations Division (FOD), N.S.S.O., Government of India is declared as the Statistics Authority in terms of the aforesaid Act, while the Director of Planning, Statistics and Evaluation (DPSE), Government of Goa, has been appointed as the Officer on Special Duty for Goa State by the Government of India to ensure proper supervision and control over the coverage of factories located in this State.

1.3 **Scope and coverage:** The A.S.I. covers the factories registered under The Factories Act, 1948 on sample basis from the year 1999-2000 (accounting year of A.S.I. 1998-99), shifting from the existing pattern of selection of factories of complete enumeration or census in the State. The coverage includes manufacturing factories as also those service industries and activities like cold storage, water supply, repair of motor vehicles and other consumer durables such as watch etc. As against 522 factories covered under Annual Survey of Industries during 2007-08, the numbers of factories covered during 2008-09 were 519.

1.4 **Classification of Industries**: The NIC-1970 was followed to classify economic activities of the factories from ASI 1973-74 to ASI 1988-89. NIC- 1987 had then been introduced and followed till ASI 1997-98. NIC -1998 was then followed from ASI 1998-99 to ASI 2003-04. From ASI 2004-05, the new series of classification i.e. NIC -2004 has been introduced and the same has been used till ASI 2007-08. For ASI 2008-09, NIC-2008 has been introduced. It classifies all the factories in the ASI frame in their appropriate industry groups on the basis of the principal product manufactured. This way a unit gets classified in one and only one industry group even though it might be manufacturing products belonging to different industries. The estimates for different aggregates presented in this report at two or three or four digit level of industry correspond to the NIC-2008 classification. Details of this classification have been shown in Annexure- 8.

CHAPTER TWO

CONCEPTS AND DEFINITIONS

2.1 **REFERENCE YEAR** for ASI 2008-2009 is the accounting year of the factory ending on 31st March 2009 while the survey was conducted in 2009-2010.

3.5 **Some technical structural ratios/coefficients**: Above table reveals certain important structural ratios and coefficients which are the basic structure of the contribution to the economy.

3.6 The fixed capital utilized by each factory unit in case of all the activities and that under manufacturing sector, which also forms the major sector, works out to the value of Rs.862.07 lakh and Rs.1014.45 lakh and Rs. 843.34 lakh and Rs. 999.20 lakh respectively during 2007-08 & 2008-09. The ratio of Net value added per factory has increased from Rs.767.40 lakhs in 2007-08 to Rs.973.24lakhs in 2008-09 under manufacturing sector and similar trend is visible under “Others” category. Net value added per person engaged shows an increasing trend in manufacturing sector but it has declined under “Others” category of industries. Average wages per worker per annum works out to Rs.90 thousand each during 2007-08 and 2008-09 in respect of all activities as well as under manufacturing sector. The number of workers employed per factory during 2008-09 over 2007-08 has increased in both the sectors viz. manufacturing and factories covered under “others”

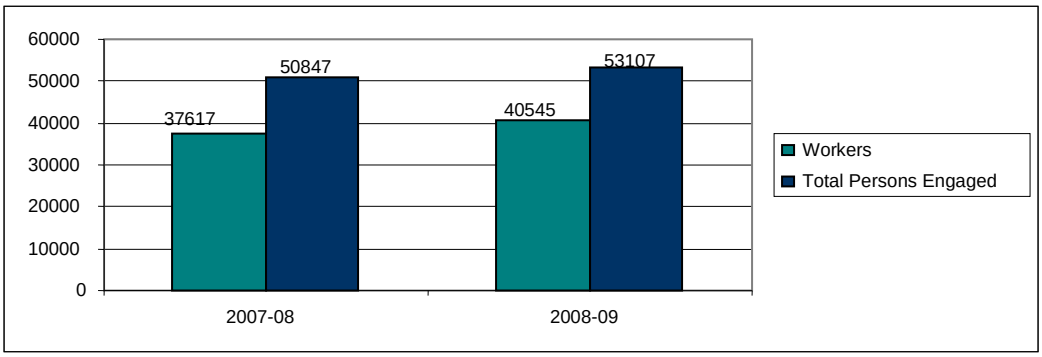

group. Gross output per person engaged shows an upward trend in manufacturing sector, but it has declined in “Others” sectors. As regards Technical Coefficients, the coefficient of fixed capital to net value added stood at 1.15 and 1.07 during 2007-08 and 2008-09 respectively under the sector “All activities”. The coefficient of Fixed Capital to Gross Output has declined from 0.24 in 2007-08 to 0.19 in 2008-09. Also the coefficient of net value added to gross output has decreased from 0.21 in 2007-08 to 0.18 for the year 2008-09. Total emoluments paid in terms of Net value added generated has gone down in Manufacturing sector, whereas in “Others” category the technical coefficient has increased from 0.20 in 2007-08 to 0.22 in 2008-09.

It may be observed that a very large in number viz.506 and 497 or 96.93% and 95.76% of the total factories belonging to wholly private ownership category, controlled the whole set up dominating in all attributes over all the sectors. This sector alone provided employment to 34150 and 35755 workers during the years under discussion, which works out to 91% & 88% for both the years, utilized fixed capital worth Rs.4383 crore (97.40%) and Rs.4880 crore (92.69%) and thereby produced goods/services worth Rs.18017 crore (95.46%) and Rs.25884crore (94.03%) which accounted for increasing the level of income of the state in the form of net value added by Rs.3571crore (91.45%) and Rs.4290crore (87.52%) respectively of the total for both the years i.e. 2007-08 and 2008-09.

Structural ratios and technical coefficients: Certain structural ratios and technical coefficients for each type of ownership are given in table 6.3. On an average each person engaged in wholly private sector generated an income in the form of net value added which was worth Rs.7.66 lakh and Rs.9.07 lakh during both the years. It utilized fixed capital worth Rs.9.40 lakh and Rs.10.32 lakh respectively during 2007-08 & 2008-09, but the remuneration paid to each worker in this profit oriented section was of the order of Rs. 89 thousand and Rs 90 thousand respectively during both the years which was much lower in comparison with public sector.

The net value added for each rupee of gross output produced in public sector has increased from 12 paise in 2007-08 to 17paise in 2008-09. Each rupee of gross output produced came from utilization of fixed capital worth 67paise and 45paise respectively during 2007-08 & 2008-09 in Public Sector and it was 24 paise & 19paise in wholly private sector during respective years. Similarly each rupee of net value added has come from utilization of fixed capital worth of Rs.5.67 and Rs.2.61 respectively during 2007-08 and 2008-09 in public sector, while it was Rs.1.23 and Rs.1.14 in wholly private sector during respective years.

Among all the sectors, the average emoluments paid to person engaged in production activity in relation to NVA generated was higher in public sector during both the years.

Figures in brackets indicate percentages

The corporate sector as usual, having controlled the industrial scenario under type of organisation, accounted for 332 and 389 factories or 63.60% and 74.95% of the total number of factories and held fixed capital amounting to Rs.4360 crore and Rs.5139 crore comprising 96.89% and 97.61% of the total fixed capital and employed 32829 and 36654 workers i.e. (87 % and 90 %) of the total during the years considered. The contribution of this sector to the value of output was of the order of 97% & 98% in both years respectively, while net value added was Rs.3765 crore and Rs.4673crore (96% & 95%) of the total.

Under the corporate sector, the number of factories classified under Private limited company/ organizations were 39.27% and 49.13% of the total during the year 2007-08 & 2008-09 respectively. They utilized 30% and 32% of the fixed capital, their contribution to the value of output and NVA was 24% and 31% and 17% & 32% respectively and employed 32% & 36% of the total workers to carry out the production activity during the year 2007-08 & 2008-09. It may also be noted that though the number of public limited companies were less than the private limited companies, the fixed capital in public limited companies was as high as 67% and 65% during the years under consideration. The gross output of public limited companies too was significantly high being 73% and 67% respectively which resulted in net value added of 80% and 63% of the total during the year 2007-08 and 2008-09 respectively. Similarly, these factories had employed more than half of the total workers during both the years.
