CHAPTER 9

Industries, Information Technology & Mines

1. INDUSTRIES TRADE & COMMERCE

The State of Goa envisages catalyzing economic growth through accelerated industrial development. The mission is to create sustainable employment opportunities mainly to the people of Goa. It also includes environment friendly industrial development ensuring balanced growth of regions, a facilitative regime that explores and unleashes the energies of the private sector to create an environment in which industry both existing and new can prosper. As on 31.10.2007, the State has 7119 small scale industrial units permanently registered and 209 medium and large scale industrial units, providing employment to 49201 and 25664 persons respectively.

There have been continuous efforts to accelerate the pace of industrial development in the State, which envisages various schemes like Employment Subsidy Scheme, Capital Contribution to Industries, Share Capital Contribution to Local Entrepreneurs and Self Employment, Interest Subsidy Scheme, Certification/Patenting Incentives, Incentives for Consumption of Local Raw Material, Export Market Development Scheme, State Investment Subsidy for Industrial Units, Deen Dayal Swayam Rojgar Yojana, setting up of Special Economic Zone, setting up of Film/Infotainment City and Ethnic Village, setting up of Bio-tech Park, setting up of Apparel Park, etc.

Since the implementation of the Act in the State, the Directorate of Industries Trade & Commerce has received 95 applications till date for seeking information under Right to Information (RTI) Act. Of these, 90 applicants have been provided with the required information and 5 applications are being processed.

Achievements

- During the year 2006-07, 45 small scale industries have been permanently registered with an investment of Rs. 1140.79 lakh providing employment to 558 persons. In addition, 600 small scale industrial units have been registered provisionally with an investment of Rs. 7,177.87 lakh and generating employment for 5307

persons. Similarly, during the year 2007-08 upto October 2007, 14 small scale industries have been permanently registered with an investment of Rs. 111.89 lakh providing employment to 76 persons. In addition, 238 small scale industrial units have been registered provisionally with an investment of Rs. 2538.75 lakh generating employment for 3004 persons.

- Government of India has changed the term "Industry" to "Enterprise" w.e.f. 02/10/2006 and the Enterprises are classified as Micro, Small and Medium Enterprises, separately under manufacturing and service sectors. In all 532 enterprises have been registered provisionally (484) Micro, (47) Small and (1) Medium from 2.10.2006 till October 2007.
- The State has a High Powered Co-ordination Committee to accord permission for setting up of medium and large scale industries in the State. The Committee has cleared 369 Industrial Projects upto the year 2006-07. No industrial projects have been cleared by the Committee during the year 2007-08 till date.
- During the year 2006-07, an amount of Rs. 213.53 lakh was utilized for sanction and disbursement to 53 industrial units under the Goa State Investment Subsidy scheme.
- During the year 2006-07, 37 applications have been recommended by the Task Force Committee (TFC) to the various banks of which 28 beneficiaries have been sanctioned loan to the tune of Rs. 20.54 lakh under the PMRY scheme. During the current financial year 2007-08, upto November 2007, 24 applications have been recommended by the TFC to the various banks which are still under process for sanctioning loan to beneficiaries through banks.

a. GOA HANDICRAFTS RURAL & SMALL SCALE INDUSTRIES DEVELOPMENT CORPORATION LTD (GHRSSIDC)

Goa Handicrafts Rural & Small Scale Industries Development Corporation Ltd (GHRSSIDC), A Government of Goa Undertaking, continues to serve the SSI Units, Artisans, Self Help Groups aimed at generating self employment through various schemes/training programmes.

Achievements under various programmes

- Under the Preferential Purchase Scheme, GHRSSIDC purchases products manufactured by local SSI units such as office furniture, computer stationery, PVC Water Tanks, RCC Pipes etc., on Rate Contract basis for which Corporation earns a moderate commission. GHRSSIDC is also the Consignment Agent for Steel Authority of India Ltd. (SAIL) and supplies iron and steel items to SSI units.
- Steps are taken to mobilize the resources by obtaining dealership status with Larger Scale Industries and MNC

such as M/s. L.G. Industries, D-Link India Ltd., Xerox India Ltd., Apollo Tyres etc. in order to cater to the needs of Government departments, semi Government departments and Autonomous Bodies. A MOU is signed with M/s. Jindal Steel, ESSAR, local re-rolling Mills in addition to Steel Authority of India Ltd. (SAIL) in order to augment supply of steel and iron to SSI units and L.S.U.

- 12 training classes have been conducted and 285 persons are trained in various crafts like Imitation Jewellery, Pottery, Coconut Shell, Hand made paper products, Azulejos Tiles painting, Soft toys, Sea Shell craft, Jute bag training under the Training scheme for Artisans and unemployed youth.
- Under the scheme "Rural Artisans for Participating in Interstate Crafts Mela and Visiting Handicrafts Establishments in Other States", a group of 20-30 Artisans from within the State are selected by the Corporation and are sent on interstate study tours of 10-12 days duration. They are taken to centres of excellence, craft villages, handicraft clusters, exhibitions and emporia of other States. Study tours to West Bengal/Karnataka/Maharashtra have been organised and 222 Artisans have been benefited.
- Under the scheme "Exhibitions", Goa Youth Rojgar Yojana, 29 kiosks have been allotted for the benefit of unemployed youth during 2007-08. Various exhibitions have been held to popularize handicraft products.

b. KHADI & VILLAGE INDUSTRIES BOARD

The Khadi & Village Industries Board (KVIB) implements the schemes formulated by the KVIC, Mumbai. Presently, the Margin Money scheme of the KVIC is under implementation. During the year 2007-08, the Board has sanctioned 24 fresh proposals with the project cost of Rs.47.59 lakh involving the subsidy component of Rs.13.34 lakh. Out of the proposals recommended to the banks, 29 proposals with the project cost of Rs.120.37 lakh involving the subsidy component of Rs.32.12 lakh have been sanctioned by the Bank. These proposals are expected to provide employment to 196 persons. So also, the Board has disbursed the subsidy component of Rs.73.14 lakh to 78 earlier projects with the project cost of Rs.288.96 lakh. 32 proposals with the project cost of Rs.110.22 lakh involving the subsidy component of Rs.28.60 lakh are pending for disbursement.

The Board has formulated a new scheme to provide financial assistance to the individuals at concessional rate of interest. The scheme is under consideration of the Government.

The Government of India has formulated a new scheme called "SFURTI" (Scheme of Funds for Regeneration of Traditional Industries). SFURTI envisages development of clusters of Village Industries. The matter is referred to Government of Goa and also Government of India for their approval.

The Board intends to open a marketing outlet for sale of Khadi and Village Industry products thereby providing marketing avenues for the Village Industry Units. The proposed location of the outlet has been identified and the matter is referred to Government for approval.

The Board has executed a Memorandum of Understanding with Agnel Entrepreneurship Development Institute to provide Entrepreneurship related consultancy to the beneficiaries. This has enabled the Board to provide consultancy such as identification of beneficiaries' skill training, documentation of credit linkages with the banks, awareness programmes etc.

c. ECONOMIC DEVELOPMENT CORPORATION LTD

The Economic Development Corporation Ltd (EDC) established in the year 1975, has been the main catalyst for industrial growth in Goa and an excellent channel for delivery of Government policies. Like in the past, the financial and other development activities of the Corporation continued during the year 2007-08, with emphasis on further improving the operations of the Corporations. EDC has also embarked on a prestigious diversification plan, which would encompass several other areas of new business avenues.

Achievements

- EDC has sanctioned a loan of Rs.115.00 crore to M/s. Goa State Infrastructure Development Corporation (GSIDC) for financing infrastructure projects.
- Under the Chief Minister's Rozgar Yojana (CMRY) about 100 additional unemployed persons were sanctioned loan assistance amounting to Rs.24.90 crore.
- As a part of its new business initiatives, the EDC has developed a 100 capacity multipurpose A/c Auditorium named "NALANDA" which was inaugurated on 22nd November 2007. The auditorium which contains modern facilities and latest audio visual equipments, would cater to training and other activities of the Corporation as well as hired to other organizations for similar activities.
- The "Centre for Empowerment & Excellence" was also launched on this occasion. The main focus of this venture would be on high performance training programmes for middle and senior level managers of corporate houses as well as first generation & existing entrepreneurs, Government officials, etc. aiming to enhance their leadership skills.
- The operations of EDC have been consolidated to take up new business activities and diversity into other profit generating areas.

2. INFORMATION TECHNOLOGY

An important achievement in IT sector is the successful implementation of Goa Broad Band Network project in PPP format. This will

ensure connectivity from State HQ to district HQ and taluka HQ and then to each and every household through Optic Fiber Cable (OFC) and wireless wherever connecting through OFC is not possible. Setting up of Government Portal and State Data Centre is also taken up and will be linked to the GBBN project. As a Technology and Commercial Business Partner M/s. United Telecom Ltd. has been awarded the Goa Broadband Network Project (GBBN).

a. Goa Broad Band Network (GBBN) Project

The Government of Goa has made a foray into the world of hi-tech e-governance with the implementation of an end-to-end IP backbone in the State, which carries data, phone calls as well as videoconferences on the same converged infrastructure. This Super-high speed network infrastructure will be leveraged to change the way Administrative Services are delivered to citizens, business community and Government employees. The network will be used for communicating between the G2G, G2B, G2C, and other Government departments. The network's potential will also be harnessed by putting it into use for broader range of applications including social usage such as e-learning.

The Goa Broad Band Network was inaugurated on 27th December 2007, connecting State Head Quarters (SHQ) (Panjim), District Head quarters (DHQ) (Margao), Taluka Head Quarters (THQ)-Mapusa, Pernem, Bicholim, Ponda, Valpoi, Quepem, Sanguem, Canacona, Vasco. GBBN connectivity is also made available to about 280 Government offices upto taluka level. 100 Village Gram Panchayats are being connected with underground cabling by end of February 2008 & remaining will be connected by March 2008.

Recently, Goa has been awarded as the Best E-Governed State in the entire West Region by Dataquest. Also on the 1st December 2007, Goa has been awarded as the Best Progressive e- Governed State along with Jharkand by CSI Nehilent Award Ceremony.

b. E-governance

As a step towards attaining the status of a fully e-governed State, the directorate has prepared e-governance roadmap, with a focus on Citizen Centric (G2C) and Business Centric (B2C) Services. Through this initiative, more than 600 services have been identified to be delivered to the citizens and business community. All the services are prioritized based on the volume of transactions. The department has also prepared the capacity building roadmap for the State of Goa.

c. Integrated Information Infrastructure (i-3) Project

The Government of Goa has initiated a Project named Integrated Information Infrastructure (i-3), which is a giant leap of e-Governance. The critical element of e-

Governance is Information & Communication Technologies (ICTs), which enables Government of Goa to modernize its Service Delivery, which consist of Single Official Portal, Lok Seva Kendra and State Data Center. Implementation of (i-3) project is in progress in 10 departments and is in final stage of completion. The remaining 22 departments shall be taken for implementation shortly and will be completed by end of March 2008.

Goa envisages that adoption of an Integrated Service Delivery framework is a key for success in modernizing its service delivery. Goa has identified e-Government Portal (Single Official Portal) as one of the key components of the Integrated Service Delivery framework for providing online and instantaneous access to information and transactional services of the Government to all the Stakeholders.

Goa has identified Lok Seva Kendra (Single Window Service Delivery Channel for Government Services), for enabling the citizens and businesses in the State to avail all the Government services at one place, instead of approaching multiple departments for various services. While Single Official Portal is aimed at catering to the ICT friendly citizens and businesses, the Lok Seva Kendras are planned for those willing to perform online/offline transactions through some assistance.

Government of Goa (GoG) proposes to implement several other e-Governance initiatives planned at the State and individual department level. Implementation of these e-Governance initiatives and rollout of existing initiatives requires reliable IT Infrastructure including the high-performing servers, communication systems, storage capacity and state-of-the-art security infrastructure etc. GoG, with an objective to consolidate its Information Processing Infrastructure of various key e-Governance applications and individual departments, has established a State Data Center (SDC), which will provide common platform for all the State departments for sharing the IT Infrastructure required for their individual e-Governance initiatives. These three projects (i) Single Official Portal (ii) Lok Seva Kendras and (iii) State Data Centers are interrelated and each of them have dependencies on others for implementation of an effective Integrated Service Delivery Framework as envisaged by Government of Goa.

State Data Center (SDC): Installation of all IT, Non-IT equipment and Infrastructure is completed along with the GBBN Optical Connectivity. The SDC will be soon operational.

Single Official Portal: The website (www.goa.gov.in) is ready and presently hosted at NIC data center Delhi for testing. Basic information (static) about the departments and Government is available for testing and approval by the concerned Head of departments. The Portal will be operational once the State Data Center is operational.

Lok Seva Kendra: Development of various services of Panchayats/Municipalities have been completed and other services like electricity and water bills collection are in progress along with testing. 15 Integrated Citizen Servive Centers (ICSCs) will be made available with ready infrastructure by end of February 2008.

It Knowledge Centers: Government of Goa has envisaged an objective of creation of a large pool of computer literate manpower which will be very helpful for the State to make the exercise of introducing e-governance solutions much more meaningful and enabling the citizens for quality job opportunities in IT Software/IT enabled services including BPO.

As a part of Goa IT Mission, IT Knowledge Center project will have at least one IT Knowledge Center at each of the 36 census towns and at four major towns namely Panaji, Margao, Mapusa and Mormugao. This Project initiative will reap the benefits of IT revolution and will provide ICT access to all sections of the society, bridging the divide between 'information poor' and 'information rich', developing locally relevant content and skill-set up-gradation of the common people. The vision is to give computer training to at least one member of every family till the village level. The centers will also provide job oriented IT training to the local youth.

3. NATIONAL INFORMATICS CENTRE

a. Board of Technical Education [Diploma Result Processing System (DRPS)]

A system has been designed by National Informatics Centre (NIC) to automate the activities involved in examination section of BTE and to maintain the information of students taking admission to various diploma programmes conducted by the polytechnics across Goa. This system processes examination results of every semester and the result data is updated against each student at the end of the semester. This system facilitates sharing of students' data between the institutes governed under Board of Technical Education.

b. General Assembly Election 2007

i) Nomination System

The system has been implemented to handle the nomination activities of General Assembly Election 2007. The software has the following features:

- Entry of Nomination Form
- Generating Notice of Nominations (Form 3A)
- Notice of Nominations (Form 3A-Cumulative)
- Entry of FORM-A/Form-B receipt Status
- Print List of nominated candidates
- Scrutiny (Accept/Reject nominations)
- Print list of validly nominated candidates (Form 4)
- Entry of withdrawals candidates
- Generating notice of withdrawals

- Generating notice of withdrawals (Form 6)
- Allot symbols to the candidates
- Print List of contesting candidates (Form 7A)

ii) Poll staff management system (three stage randomizations)

The system is developed and implemented in North and South Goa Collectors office to select and post Government employees from the State and Central Government departments to various polling booths in different assembly constituencies.

The system takes care of all the election guidelines given by the Election Commission of India while processing 2nd and 3rd stage randomization to allot polling staffs to various assembly constituencies and polling booths. All poll related orders, training schedules, attendance scrolls and Election Identity cards are generated from the system.

(iii) Polling Day

Support is extended on polling day by deploying application software to capture the voters turn out on two hourly basis. These details are immediately made available to North and South Goa district collectors and office of CEO.

(iv) Counting Day

Support is extended on counting day by implementing application software to capture the round wise counting details, round wise leading candidates, generating necessary reports required by Returning Officers.

All counting halls, district collector offices and the CEO office are interconnected with Local Area Network (LAN). The network setup is used to show the round wise details instantly to the CEO office as soon as the counting of each round is completed.

All the above mentioned activities for the General Assembly Election 2007 were also carried out for the South Goa Parliamentary bye-election 2007.

c. Computerization of Directorate of Accounts (DoA)

The computerization of entire department is being carried out by incremental approach. During the current year, the following system has been developed and implemented

.(i) Pension Accounting System

The DOA makes pension payment to the State Government employees as well as employees of other State and central Government employees who have settled in Goa. This comprehensive system is designed to work out retirement benefits for all new pension cases, as well as to work out monthly pension payment to all pensioners. Claims with other State Governments are also worked out using this software.

The benefits of the system are:

- The software works out Retirement benefits by applying all business rules.

- Records of all pensioners past and present are maintained electronically.
- All registers/reports are generated electronically.
- Other options like settling of inward claims, transfer of pension and monthly pension are also provided.
- Pension due will be available online to the pensioner.

(ii) Management Information System

The system is designed to facilitate the Finance Department to access various important data on day-to-day basis on receipts, expenditures of treasuries, Budget Control Register of each department and the summaries of BCR, details of Cheque issued etc.

(iii) Broad Sheet System

The system has been designed to maintain and reconcile the cheque issued in North and South Goa with cheque encashed details received from the State Bank of India on day-to-day basis.

d. Common Integrated Police Application (CIPA)

The CIPA package addresses the functional day-to-day work requirements of the Police Stations with respect to registration of various cases, including unclaimed properties/dead bodies reported at the Police Stations, their investigation, including coordination of lost and the recovered properties, disposal/ charge sheeting by Police, and disposal of case by the Court etc. The main task of computerizing the Police functionalities is to maintain the details pertaining to all the activities of the Police Stations relating to crime and criminals. The system provides required information periodically and as and when required to the higher levels. The system also generates various statutory reports for the smooth functioning of the Police Station. This package is implemented in the Police Stations at Porvorim, Calangute, Mapusa and Ponda.

e. Payroll

The package is designed to automate the process of preparing pay bills every month by the DDO. The system has several features like generating bill earnings and deductions Statement, Deduction Schedules, Pay Slips to employees, Income-tax forecast etc. The system has been implemented in 40 State Government departments/offices.

f. Websites

The following websites are developed and hosted at NIC, New Delhi

Name of Department	Website Address
Directorate of Technical Education	www.dtegoa.gov.in
Goa Information Commission	www.goasic.gov.in
Goa Public Service Commission	www.goapse.gov.in
Goa Institute of Rural Development	www.sirdoldgoa.gov.in
Central Library, Goa	www.goacentrallibrary.gov.in
Goa Government (New Site)	www.goa.gov.in

e. Training

Half-day training programme is conducted at NIC, training hall for the employees of State and Central Government on Introduction to Computers and Advanced Office Automation Tools. Orientation programmes on Computer Antivirus, Payroll package are also conducted from time to time. During the current year, around 450 employees have been trained in various programmes.

4. MINES

The State of Goa is endowed with abundant mineral resources like iron ore, manganese ore and bauxite etc. Iron ore industry is a dominant mining industry not only providing employment to a number of persons both directly and indirectly but also contributing significantly to the foreign exchange earnings. During the year 2006-07, the production of iron ore was to the extent of 30.7 million tons. The export of iron ore to different countries during the said period was to the tune of 30.8 million tons. The total receipts of major and minor mineral from royalties, dead rent etc. were of the order of Rs. 25.15 crore.

a. Environmental Studies in Mining Areas

The scheme envisages study of geo-environmental aspect in the mining areas with special reference to pollution from mining waste and water pumped out from mining pits which affects low lying agricultural land, wells, rivers etc. The present annual production is of the order of 30 million tons and with an ore to rejection ratio of 1:2.5-3 the total mining waste generated in the process works out approximately to 75 to 90 million tons. Such a huge quantity is a matter of concern as it is a source of degradation of land and pollution to air and water. With a view to minimize the adverse effect, the directorate has set up various sampling points for monitoring the turbidity during monsoon and it carries out periodical checking of the water samples. Efficacy of the measures adopted by the mining companies to arrest the silt are assessed and necessary instructions are issued to the mining companies to take the required measures.

Achievements

- The mining activity in the State of Goa is in the private sector and considerable work of prospecting and exploration has

been done by the private mining companies and the data is scattered and not much information is readily available. In order to draw up a proper and systematic inventory, it was proposed to prepare a plan of mining leases clusterwise and thereafter the information and data generated by mining companies be collated. So far, 140 mines in North Goa and 259 mines in South Goa have been covered

- Two branch offices, one each in North Goa and South Goa are being setup and the required staff has already been recruited and the staff will be posted after completing the necessary formalities. This will avoid the hardships being faced by the parties to apply for the licenses.
- During the year 2007-08, 45 parties have been registered as mineral traders under the Goa (Prevention of Illegal mining, Transportation and Storage Rules) 2004. Special attention was also paid in gathering the information from the registered mineral traders.
- 177 applications were received for grant of prospecting licenses and 47 applications were received for grant of mining leases. Assessments for the purpose of collection of royalty were completed in 12 cases and valid clearance certificates were issued.
- With a view to mobilize additional resources, surface rent on mining leases has been enhanced from Rs. 150/- per ha. to Rs. 300/- per ha. with effect from 10/8/2007.
- The Minor Mineral Section granted 39 leases for extraction of different minor minerals during the period 2007-08 and renewed 7 quarrying leases. A total number of 581 transit pass books were issued to different parties in schedule III and schedule IV.
- The Directorate of Mines was associated with the celebration of Mines Environment and Mineral Conservation week during the period from 14th to 19th January 2008.

b. Environmental and social development programmes undertaken by the Mineral Foundation of Goa

- The Mineral Ore Foundation is professionally managed and totally dedicated to promotion of environmental and social development programmes in the mining belt of Goa. The Foundation through its various programmes contributes to economic growth, employment generation, social upliftment of communities and environment conservation in the mining belt. It covers more than 50 villages across 5 talukas of Goa. Presently, the Foundation has embarked on a journey of sculpting a model village with a tri-sector partnership between the State Government, Local community and the Local mining company. The project is termed as "Gram Nirman".
- As regards health care, the Foundation strives to cover the student community in the mining belt at least once a year.

During the year, 12 camps were conducted covering 2597 students. Blood group detection and haemoglobin level testing camps were conducted and the students were provided with blood group cards with individual details. Health camps are also conducted for general public with special emphasis on children below the age of 12 and adults above the age of 45. 8 camps were conducted in villages covering 914 patients. 116 patients have undergone free cataract surgeries.

- The MFG-LABS project is run in association with the Livelihood Advancement Business School of Dr. Reddy's Foundation and aims at identifying school dropouts and unemployed youth and train them with employable skills. The programme begins with identification of the youth, followed by counseling, aptitude tests and an intensive training of 90 days with classroom sessions and on job trainings. 185 youth have been trained and 132 have been placed in various sectors.
- The Foundation has initiated the Nature Club Programme in 22 schools to foster learning through experiencing from 2004-05. Five Nature Orientation Camps are conducted for the students from the member schools at Bondla Wild Life Sanctuary. An Advanced Nature Camp has been planned for the selected Green students in the summer vacations. A teachers training workshop was organized by the Foundation to assist and guide the teachers to select and implement activity based projects under National Children's Science Congress (NCSC). Two schools represented the State at these NCSC held at Sikkim.
- A book "A Photographic Guide to the Butterflies of Goa" has been published and has gained immense popularity amongst the layman and the serious scientific worker.
- The Foundation has strived to empower women to stand on their own feet and be decision makers. The women are organized into Self Help Groups (SHGs) and the importance of participation, co-operation, unity, trust and thrift is instilled in them. They are further trained to manage the SHG through account keeping, conduct meetings, book-keeping etc. Active SHGs are then provided training in various livelihood skills depending on their interest and competence. The Foundation also makes an effort to provide marketing avenues for the ladies and establish linkages with the market.
- The Foundation has been at the fore-front in Natural Resource Conservation and raising awareness on various environmentally relevant issues. It also implements action oriented projects like restoration of waterways, old tanks, ponds and lakes, creation of water storage facilities etc.
- Two major water ways, the Surla Nallah and the Colamb in Mulgao were taken up for restoration during the year.
